

Axygen® MultiRack Tip System

Filter & Reload Promo

The Axxygen MultiRack tip system has been engineered to fit most of the pipettors in the market.

It is an interchangeable, complete system offered in bulk, racked, filter, and reload packaging styles to meet the variety of needs in the lab setting.

The MultiRack tip system offers standard and extended-length tips allowing volumes from 0.1 µL to 1250 µL.

Axygen MultiRack tip system products are made in the USA and meet ISO standards. All tips are free of detectable RNase, DNase, DNA, and pyrogens.

Features

- ▶ Reusable rack with reload systems
- ▶ Small footprint and stackable design for maximum bench space usage
- ▶ Extended tips offered in 10, 200, 300, and 1000 µL sizes
- ▶ Color-coded racks for easy volume identification

Axygen MultiRack Reload System

Axygen MultiRack Reload System is designed to fit the Axxygen MultiRack System without tedious re-alignment. This design not only saves lab space but also reduces environmental impact. Sturdy racks resist accidental tipping, and the easy-close lid lock prevents tips from falling out of the rack while closed.
