

# PST-100HL, Plate Shaker-Thermostat

## Premium Product Class

### DESCRIPTION

Plate Thermo-Shakers are designed for shaking and thermostating 2 standard 96-well microplates.

A multisystem principle, used in design of the Thermo-Shaker, allows operating it as 3 independent devices:

- Incubator;
- Microplate shaker;
- Thermo-Shaker.

A distinctive feature of Biosan Plate Thermo–Shakers is thepatented by the company Two–Side Microplates Heating, which allows to achieve full correspondence of the set and actual temperature in the microplate wells.

Thermo-shaker **PST-100HL** with the ability to stabilize the temperature up to 100 ° C is specially designed for the hybridization reactions.

Plate Shaker-Thermostat provides:

- Soft or intensive sample shaking
- Rotation speed regulation, stabilization and indication
- Even rotation amplitude throughout the Thermo-Shaker platform
- Required operation time setting and indication
- Automatic stopping of the platform movement after expiration of the set time
- Setting and indication of the required temperature on the platform

#### Application fields:

- Cytochemistry for in situ reactions
- Immunochemistry for immunofermentative reactions
- Biochemistry for enzyme and protein analysis
- Molecular biology for micro array analysis
